Vijayakumar Kabbin

General Manager,
Industrial Automation and Internet of Things

Vijayakumar Kabbin is the General Manager for Industrial Automation and Internet of Things in Wipro Technologies. He is instrumental in driving several Internet of Things (IoT) solutions for Industrial and smart city customers.

Wipro is a global leader in Engineering R&D services with solutions for manufacturing, media, telecom, technology, healthcare, energy & utilities, banking and retail industries.

Kabbin took over as the head of Industrial Automation and Internet of Things in 2014. Previously he was handling Global delivery for Embedded Group. Embedded group accounts provides a vast portfolio of services spanning Automotive, Consumer Electronics, Mobile and Medical devices and Industrial Automation in a global delivery model.

Kabbin was also responsible for Embedded Software in his earlier role, wherein he created global delivery by integrating multiple embedded groups.

Prior to this role, Kabbin was Global delivery Head for Automotive and Peripherals business unit of Wipro Technologies. This business serves top Automotive OEMs and Tier 1s across the world and helped development of state of the art Infotainment systems.

Kabbin also led the creation of largest Japanese account for Wipro as strategic Account Manager worldwide, with global business and delivery across Peripherals, Mobile, Semiconductors and systems.

Kabbin is also a certified Six Sigma black belt and carries vast experience in application of Six Sigma and Lean methodologies for software in delivery.

Kabbin has an experience of over 25 years in the IT industry. He joined Wipro as a campus recruit in 1987 and has held various responsibilities in R&D, Engineering, customer support, sales, marketing and business management.

Kabbin holds a bachelor degree in Electronics and Communications Engineering and EGMP from Indian Institute of Management, Bangalore.
